## **ABSTRACT**

Tracking regular expense is a key factor to maintain a budget. People often track expense using pen and paper method or take notes in a mobile phone or a computer. These processes of storing expense require further computations and processing for these data to be used as a trackable record. In this work, we are proposing an automated system to store and calculate these data. It is an application that runs on Android smartphones. By using this application, users can save their expense by simply scanning the bills or receipt copies. This application extracts the textual information from the receipts and saves the amount and description for further processing. It also monitors user's income by tracking the received SMS's from the user's saving accounts. By calculating income and expense it produces the user's balance in monthly and yearly basis. Overall, this is a smart automated solution for tracking expense.

## 1.INTRODUCTION:

### 1.1 PROJECT OVERVIEW:

When it comes to tracking expenses, you can make your system as simple as collecting receipts and organizing them once a month.

You might get a little more information from other expense tracking systems (listing them in a spreadsheet, using money management software or even choosing an online application), but all methods have one thing in common: you have to get in the habit of thinking about your expenses.

It's very easy to misplace a receipt or forget about any cash you spent. You may even think that a cup of coffee or a trip to the vending machine isn't worth tracking — although those little expenses can add up amazingly fast.

There are all sorts of opportunities to throw a kick into your plan to track expenses. You have to get in the habit of doing so, to reduce those lapses, and make sure that the data you're basing financial decisions on is solid.

This project will request the clients to add their expenses and in view of their costs, wallet status will be refreshed which will be noticeable to the client.

- The user interacts with the application.
- Application will ask users to add their expenses and based on their expenses and based on their expenses wallet balance will be updated which will be visible to the user.
- Also, users can get an analysis of their expenditure in graphical forms.
- They have an opinion to set a limit for the amount to be used for that particular month if the limit is exceeded the user will be notified with an email alert.
- Setting up Application Environment
- Create Flask Project
- Work with IBM Cloud CLI, Docker CLI, Sendgrid
- Implementation of Web Application
- Create UI to Interact with the application
- Connect IBM DB2 with Python Integration of Sendgrid Service with Python
- Deployment if Cloud Application

- Containerize the application
- Upload Image in IBM Container directory
- Deploy on Kubernetes Cluster

## **1.2 PURPOSE:**

- Help the people to track their expenses.
- Alert users when they exceed the limit of their budget.
- A personal finance app will not only help you with budgeting and accounting but also give you helpful insights about financial management.

## **2. LITERATURE SURVEY:**

### **2.1 EXISTING PROMBLEM:**

- Lack of visual analytics for visual data.
- Lack of support for splitting up group expenses.
- Most of the applications are used only for personal use.
- Most of the applications does not incorporate shared group expenses.
- Efforts has to be made to include each and every transactions into the input field.

### **2.2 REFERENCES:**

**TITLE:** Expense Tracker: A Smart Approach to Track Everyday Expense(Year 2020)

**AUTHOR:** Ms.J. Angelin Blessy, Anant Prakash Singh, Navneet Kumar,Hrithik Gupta

#### **SUMMARY:**

Expense Tracker is a day-to-day expense management system designed to easily and efficiently track the daily expenses through a computerized system that eliminates the need for manual paper tasks that systematically maintains records and easily accesses data stored by the user.

**TITLE:** Budget Estimator Android Application (Year 2019)

**AUTHOR:** Namita Jagtap, Priyanka Joshi, Aditya Kamble

**SUMMARY:**

This application takes income from user and divides in daily expense allowed, if user exceed that days expense it will cut it from your income and give new daily expense allowed amount, and if that days expense is less it will add it in savings. Expense tracking application will generate report at the end of month to show income-expense via multiple graphs.

**TITLE:** Voice Controlled Web Application (Year 2022)

**AUTHOR:** Raj Gandhi, Romil Desai, Marmik Modi, Dr. Suvarna Pansambal

Voice or speech recognition systems allow a user to make a hands-free request to the computer, which in turn processes the request and serves the user with appropriate responses. A voice-controlled system embedded in a web application can enhance user experience and can provide voice as a means to control the functionality.

**AUTHOR:** Saad, Hashim

**SUMMARY:**

Barcode became essential elements in sales and products services due to importance of keeping records of all items in on place. For this purpose, there are many methods implemented to make the barcode reading process become easier to users. This survey deals to develop a barcode recognition system by using image processing. The system will be able to read barcode through an image and the system capable to capture the image by using a webcam.

**TITLE:** Barcode Scanning in Android Applications (Year 2015)

**AUTHOR:** J. Vidhya and K. John Singh

**SUMMARY:**

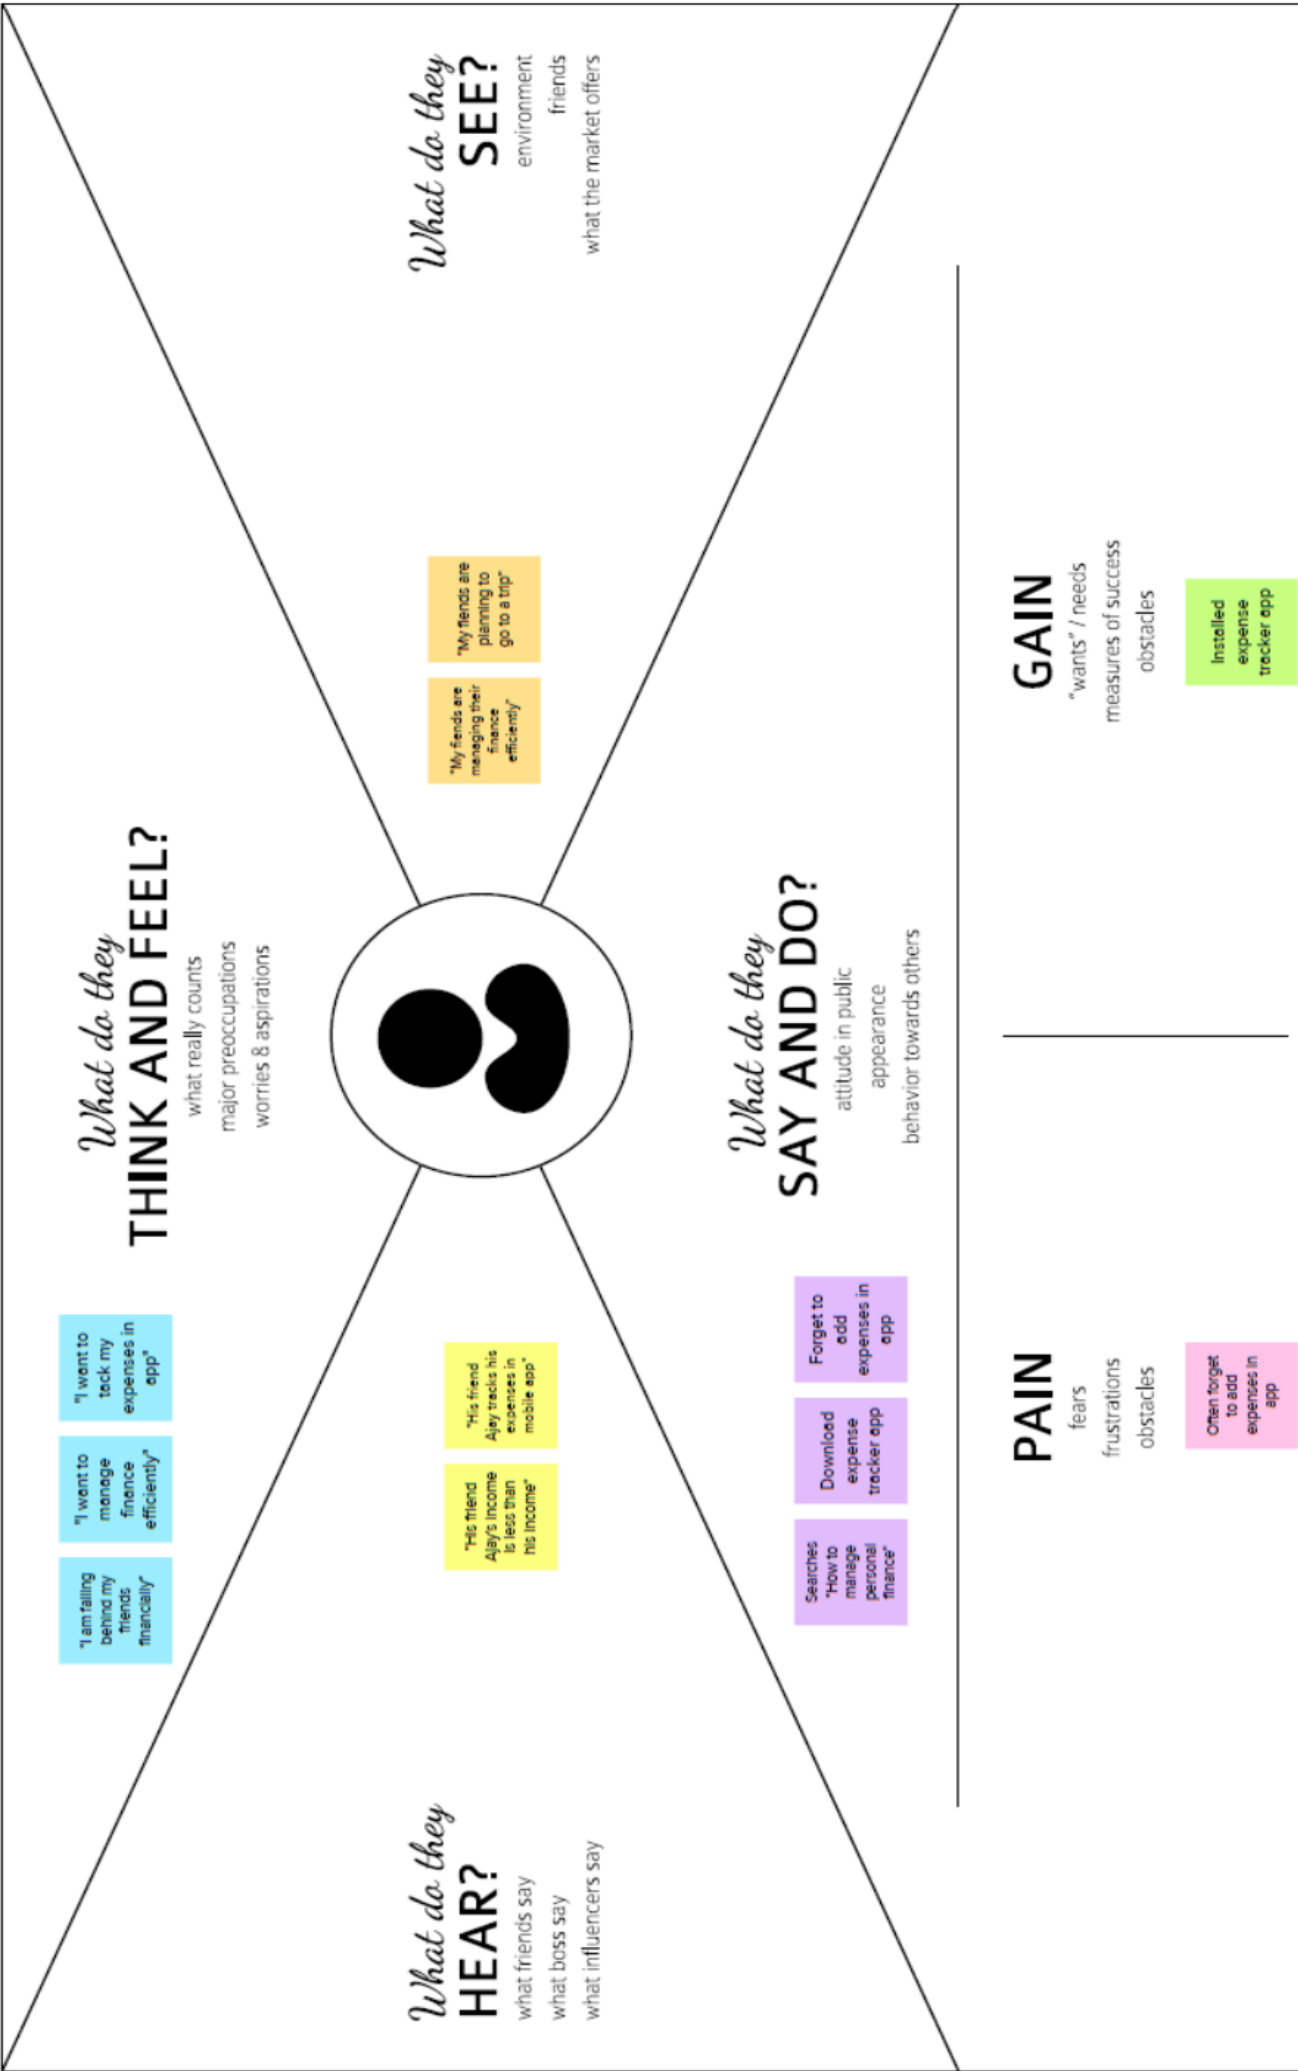

The convenience of imaging phones affords people the mobile raised area for interpreting barcode rather than the usage of the conservative scanner which leads to lack of mobility. Though, the short-range capture of barcodes through an imaging phone

## 2.3 PROMBLEM STATEMENT:

Who does the problem affect?	Investors, savers, big spenders, debtors ,shoppers, budget conscious consumers.
What are the boundaries of the problem?	Expense tracker for working individuals, students, common people.
What is the issue?	To be vigilant about the expense spent,increases financial stress. Being indecisive about the finances may result in less financial security and exceed thebudget.
When does this issue occur?	When using wrong budgeting techniques. When not tracking the expenses doesn't help you to know the amount that is actually spent.
Where is the issue occurring?	Working individuals who find it difficult to track their expenses
Why is it important that we fix the problem?	Fixing this issue, brings accountability andhelps to be intentional with the income by assign it to spending, saving and giving. Thisleads to financial stability.

## 3. IDEATION AND PROPOSED SOLUTION:

### 3.1 EMPATHY MAP CANVAS:

3.2 IDEATION & BRAINSTORMING:

BRAINSTORMING:

Karan Siranjith

Build Desktop Widgets for App	Colorful Visual Graphs
Gamified reward system	Add monthly estimated Income and expenditure limits
Fake Currency for childrens to learn with	

Karan K A

Light Weight Web App	Allow categories on expenditure
Multiple Login Methods	Provide multidevice support

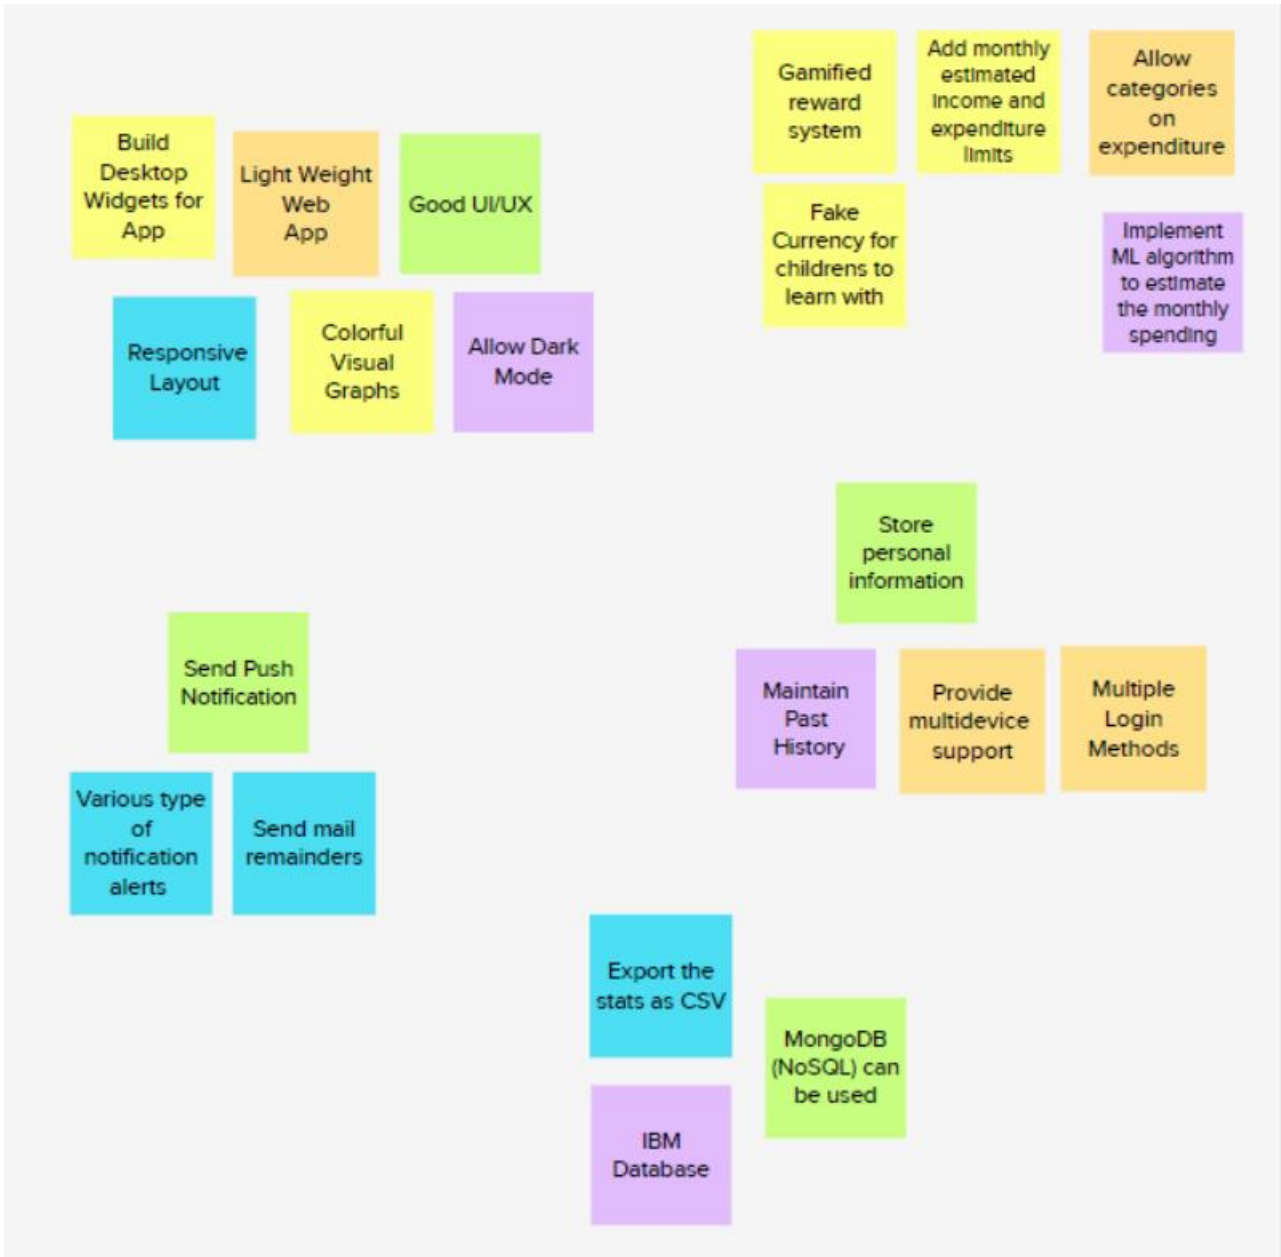

Eric Amalan

Send Push Notification	Store personal information
Good UI/UX	MongoDB (NoSQL) can be used

Harishkumar

Responsive Layout	Export the stats as CSV
Various type of notification alerts	Send mail reminders

GROUP IDEAS:

PRIORITIZE:

### 3.3 PROPOSED SOLUTION:

S.No	Parameter	Description
1.	Problem Statement (Problem to be solved)	In a Traditional Paper based expense tracking system, it is difficult to track our monthly expenses manually. Some of the records may get lost in case of fire, floods, etc. We are trying to solve this problem in a more efficient way.
2.	Idea / Solution description	This expense tracker is a computerised application which keeps track of all your finances and helps in accounting and budgeting.
3.	Novelty / Uniqueness	The User gets notified once their expense touches 50% 75% 90% & 100% of their limits. Display the costs on a monthly and weekly basis in a pie chart.
4.	Social Impact / Customer Satisfaction	This Application is able to generate reports of their spendings. It can create awareness among common people about finance. It makes users financially responsible and satisfy them without letting them to debt.
5.	Business Model (Revenue Model)	As this project is intended purely for educational purposes, we keep this application free of cost.
6.	Scalability of the Solution	This Application can handle large numbers of users and data with high performance and security. This application can be used for both large scale and small scale purposes.

### 3.4 PROPOSED SOLUTION FIT:

	<div>1. CUSTOMER SEGMENT(S)<div>CS</div><p>Be it a common man or a bigfish.... Our app comes in handy to all of those who wish to boost their expense potential. People who are unaware of financial things on how to spend their money can make use of this app.</p></div>	<div>6. CUSTOMER CONSTRAINTS<div>CC</div><p>User have to entry every record manually, sometimes while maintaining a large amount of data may look messy. User who is maintaining the system must have some technical knowledge.</p></div>	<div>5. AVAILABLE SOLUTIONS<div>AS</div><p>User can add their income and expenses. They have an option to set a limit on how much they can spend on their salary or savings. IF that particular limit is exceeded they are notified by email.</p></div>	
Focus on J&P, tap into BE, understand RC	<div>2. JOBS-TO-BE-DONE / PROBLEMS<div>J&amp;P</div><p>In a Traditional Paper based expense tracking system, it is difficult to track our monthly expenses manually. Some of the records may get lost in case of fire, floods, etc</p></div>	<div>9. PROBLEM ROOT CAUSE<div>RC</div><p>Peoples are unaware of their spending and exceeds their limit. They spend a lot without calculating their in hand salary and savings in the first place.</p></div>	<div>7. BEHAVIOUR<div>BE</div><p>People may kee notes on their mobile. They try to remember the expenses they do and calculate the whole expenses at once at the end of the month which may take a long time to calculate.</p></div>	Focus on J&P, tap into BE, understand RC
Identify strong TR & EM	<div>3. TRIGGERS<div>TR</div><p>This application can create awareness among common people about their income and expenses.it reduces time rather than entering details manually.</p></div> <div>4. EMOTIONS: BEFORE / AFTER<div>EM</div><p>Frustration, confusion, rage / Feeling smart , leading happy life, being an example for others</p></div>	<div>10. YOUR SOLUTION<div>SL</div><p>This expense tracker is a computerized application which keeps track of all your finances and helps in accounting and budgeting. It can handle large numbers of users and data with high performance and security. This application can be used for both large scale and small scale purposes.</p></div>	<div>8.CHANNELS of BEHAVIOUR<div>CH</div><div>ONLINE</div><p>People may use online tools to calculate their expenses</p><div>OFFLINE</div><p>People may use a ledger to calculate their expenses.</p></div>	Identify strong TR & EM

## 4. REQUIREMENT ANALYSIS:

### 4.1 FUNCTIONAL REQUIREMENT:

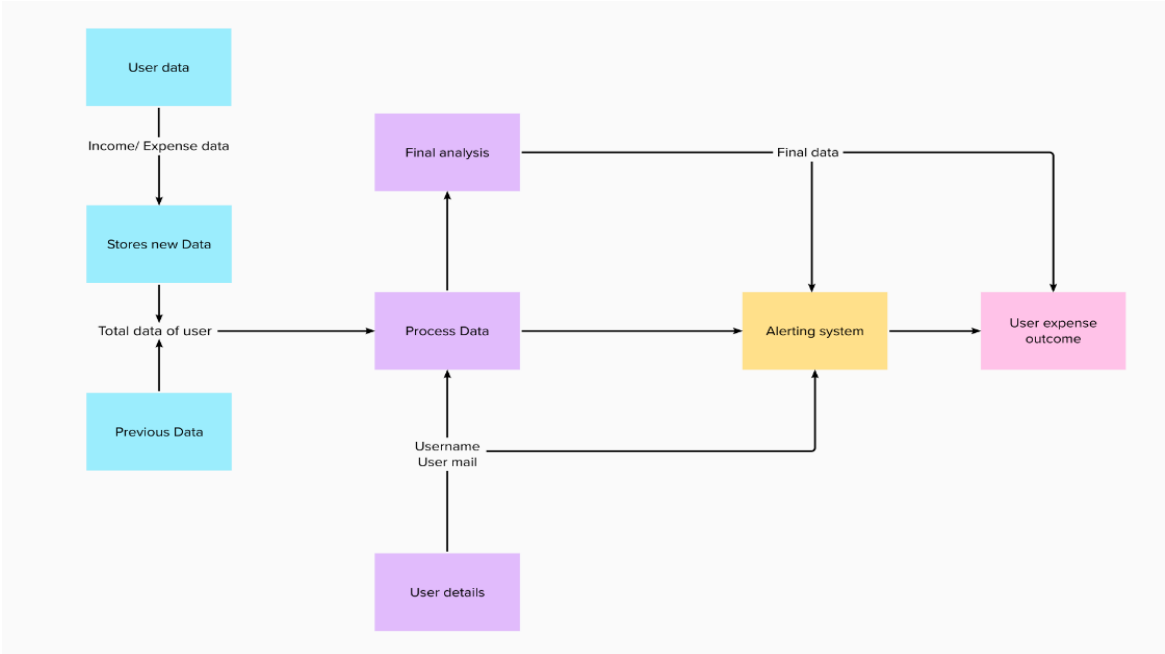

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through Gmail Registration through Email Account
FR-2	User Confirmation	Confirmation via Email
FR-3	Calendar	Personal expense tracker application must allow user to add the data to their expenses.
FR-4	Graphical Representation	This application should graphically represent the expense in the form of report.
FR-5	Report Generation	Graphical representation of report must be generated.
FR-6	Category	This application shall allow users to add categories of their expenses.

## 4.2 NONFUNCTIONAL REQUIREMENT:

FR No.	Non-Functional Requirement	Description
NFR-1	<b>Usability</b>	Helps to keep an accurate record and track of their income and expenses easily.
NFR-2	<b>Security</b>	We save the password in the encrypted form so it will add more secure to the application user.
NFR-3	<b>Reliability</b>	Each data record is stored on a well-built efficient database schema. There is no risk of data loss.
NFR-4	<b>Performance</b>	Expense kinds include categories and an option. The system's throughput is boosted because to the lightweight database support.
NFR-5	<b>Availability</b>	User can able to access the application with the help of the internet through the web browser.
NFR-6	<b>Scalability</b>	The ability to appropriately handle increasing demands.

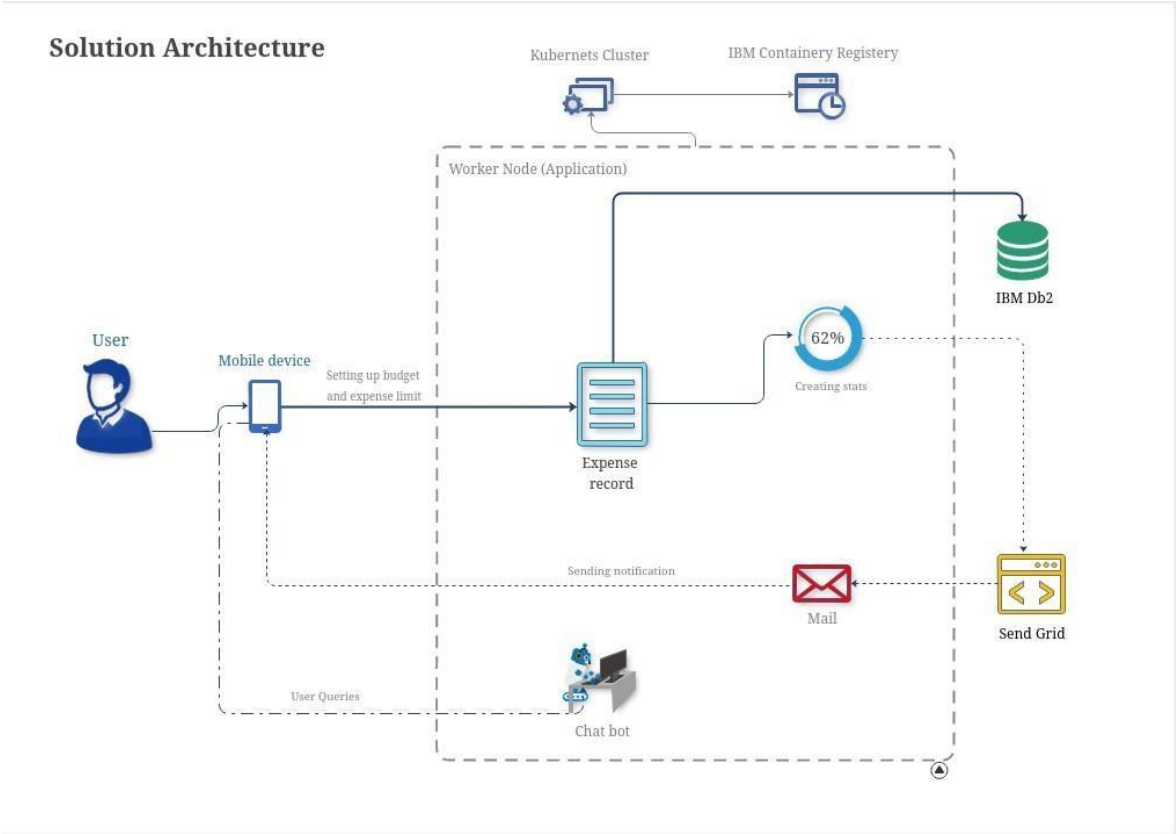

5. PROJECT DESINGING:

5.1 DATAFLOW DIAGRAM:

5.2 SOLUTION AND TECHNICAL ARCHITECTURE:

Technology Architecture:

### 5.3 USER STORIES:

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Mobile user)	Registration	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	I can access my account /dashboard	High	Sprint-1
	Login	USN-2	As a user, I can register for the application through Gmail	I can access my account/dashboard.	High	Sprint-1
	Dashboard	USN-3	As a user, I can log into the application by entering email & password	I get all the info needed in my dashboard.	Low	Sprint-2
	Order creation	USN-4	As a customer, I can place my order with the detailed description of my query	I can ask my query	Medium	Sprint-2
	Forgot password	USN-5	As a customer, I can reset my password by this option in case I forgot my old password.	I get access to my account again	High	Sprint-3
	Order details	USN-6	As a Customer, I can see the current stats of order.	I get better understanding	Medium	Sprint-4
Agent (Web user)	Login	USN-1	As an agent I can login to the application by entering correct email and password	I can access my account/dashboard	Medium	Sprint-3
	Dashboard	USN-2	As an agent I can see the order details assigned to me by admin	I can see the tickets to which I could answer	High	Sprint-3
	Address column	USN-3	As an agent I get to have conversation with the customer and clear his/her doubts	I can clarify issues	High	Sprint-3
	Forgot password	USN-4	As an agent I can reset my password by this option In case I forgot my old password	I get to access to my account again	Medium	Sprint-4
Admin user (mobile user and web user)	Login	USN-1	As a admin, I can login to the application by entering email and password	I can access my account/dashboard	High	Sprint-1
	Dashboard	USN-2	As an admin I can see all the orders raised in the entire system and lot more	I can assign agents by seeing those order.	High	Sprint-1
	Agent creation	USN-3	As an admin I can create an agent for clarifying the customers queries	I can create agents	High	Sprint-2
	Assignment agent	USN-4	As an admin I can assign an agent for each order created by the customer.	Enable agent to clarify the queries.	High	Sprint-1

	Forgot password	USN-5	As an admin I can reset my password by this option in case I forgot my old password.	I get access to account	High	Sprint-1
--	-----------------	-------	--------------------------------------------------------------------------------------	-------------------------	------	----------

## 6. PROJECT PLANNING AND SCHEDULING:

### 6.1 SPRINT PLANNING AND ESTIMATION:

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Registration	US N-1	As a user, I can register for the application by entering my email, password, and confirming my password.	2	High	Karan Siranjith M
Sprint-1		US N-2	As a user, I will receive confirmation email once I have registered for the application	1	High	Karan K A
Sprint-1	Login	US N-3	As a user, I can register for the application through Gmail	1	High	Eric Amalan
Sprint-1	Dashboard	US N-4	As a user, I can log into the application by entering email & password	2	High	Harishkumar
Sprint-2	Workspace	US N-1	Workspace for personal expense tracking	2	High	Karan Siranjith M
Sprint-2	Charts	US N-2	Creating various graphs and statistics of customer's data	1	Medium	Karan K A
Sprint-2	Connecting to IBM DB2	US N-3	Linking database with dashboard	2	High	Eric Amalan
Sprint-2		US N-4	Making dashboard interactive with JS	2	High	Harishkumar
Sprint-3		US N-1	Wrapping up the server side works of frontend	1	Medium	Karan Siranjith M
Sprint-3	Watson Assistant	US N-2	Creating Chatbot for expense tracking and for clarifying user's query	1	Medium	Karan K A
Sprint-3	SendGrid	US N-3	Using SendGrid to send mail to the user about	1	Low	Eric Amalan
Sprint-3		US N-4	Integrating both frontend and backend	2	High	Harishkumar
Sprint-4	Docker	US N-1	Creating image of website using docker	2	High	Karan Siranjith M
Sprint-4	Cloud Registry	US N-2	Uploading docker image to IBM Cloud registry	2	High	Karan K A
Sprint-4	kubernetes	US N-3	Create container using the docker image and hosting the site	2	High	Eric Amalan
Sprint-4	Exposing	US N-4	Exposing IP/Ports for the site	2	High	Harishkumar

## 6.2 SPRINT DELIVERY PLAN:

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	6 Days	24 Oct 2022	29 Oct 2022	20	29 Oct 2022
Sprint-2	20	6 Days	31 Oct 2022	05 Nov 2022	20	05 Nov 2022
Sprint-3	20	6 Days	07 Nov 2022	12 Nov 2022	20	12 Nov 2022
Sprint-4	20	2 Days	12 Nov 2022	14 Nov 2022	20	14 Nov 2022

## 7. CODING AND SOLUTIONING:

### Features:

**Feature 1:** Add Expense

**Feature 2:** Update expense

**Feature 3:** Delete Expense

**Feature 4:** Set Limit

**Feature 5:** Send Alert Emails to users

**Other Features:** Track your expenses anywhere, anytime. Seamlessly manage your money and budget without any financial paperwork. Just click and submit your invoices and expenditures. Access, submit, and approve invoices irrespective of time and location. Avoid data loss by scanning your tickets and bills and saving in the app. Approval of bills and expenditures in real-time and get notified instantly. Quick settlement of claims and reduced human errors with an automated and streamlined billing process.

### CODE:

#### app.py

```
from flask import Flask, render_template, request

## 8.TESTING:

### 8.1 TEST CASES:

S.NO	Test Cases	Result
1	Verify the user is able to see the Sign up page when the user clicks the signup button in navigation bar	Positive
2	Verify the UI elements in the Sign up page	Positive
3	Verify the user is able to register into the application by providing valid details	Positive
4	Verify the user is able to see the sign in page when the user clicks the sign in button in navigation bar	Positive
5	Verify the UI elements in the Sign in page	Positive
6	Verify the user is able to login into the application by providing valid details	Positive
7	Verify the user is able to see the add expenses page when the user clicks the add expenses navigation bar	Positive
8	Verify the UI elements in the add expenses page	Positive
9	Verify the user is able to add expenses by providing valid details	Positive
10	Verify the user is able to see the home button in the add expenses page	Positive
11	Verify whether the expenses added can be deleted from the cloud	Positive
12	Verify whether the expenses added can be edited	Positive
13	Verify whether the date, month and year are valid while user entering the expenses	Positive
14	Verify whether the data types entered by the user in the add expenses page are float or integers	Positive
15	Verify whether expenses added previously still exist	Positive
16	Verify whether the expenses amount entered fits between in the range of integers or float datatypes	Positive

### 8.2 USER ACCEPTANCE TESTING:

Test case ID	Feature Type	Component	Test Scenario	Steps To Execute	Test Data	Expected Result	Actual Result
LoginPage_TC_OO1	Functional	Home Page	Verify user is able to see the Login/Signup popup when user clicked on My account button	1. Click the my account button. 2. Check whether login/signup pop up appears	-	Login/Signup popup should display	Working as expected
LoginPage_TC_OO2	UI	Home Page	Verify the UI elements in	1. Visit the Signup/Logi		Application should show	Working as expected

			Login/Signup popup	<p>n page.</p> <p>2. Verify the UI elements.</p>	-	<p>below UI elements:</p> <p>a.email text box</p> <p>b.password text box</p> <p>c.Login button with orange colour</p> <p>d.New customer? Create account link</p> <p>e.Last password? Recover password link</p>	
LoginPage_TC_004	Functional	Login page	Verify user is able to log into application with Valid credentials	<p>1. Visit the login page.</p> <p>2. Enter right credentials.</p>	User id: karan16@gmail.com Password: karanKa	Application should not show 'incorrect email or password' validation message.	Working as expected
LoginPage_TC_005	Functional	Login page	Verify user is able to log into application with Invalid credentials	<p>1. Visit the login page.</p> <p>2. Enter wrong credentials</p>	User id: karan1606@gmail.com Password: KaranKa	Application should show 'Incorrect email or password' validation message.	Working as expected
Add_expense_page_TC_001	Functional	Add expense page	Verify the user could add the expenses &	<p>1. Visit the login page.</p> <p>2. Enter right credentials.</p>	Input data: 25	Application should store the value on entering and	Working as expected

			delete them	3. Enter input data and delete them.		deletes it on clicking delete button.	
Add_expense_page_TC_002	Functional	Add expense page	Verify the user enters only numeric values in add expense page input.	1. Visit the login page. 2. Enter right credentials. 3. Enter numerical values in input And not strings.	Input data 1: 50 Input data 2: m	Application should store numerical values and not strings.	Working as expected
Add_expense_page_TC_003	Functional	Add expense page	Verify the date, month and year are valid	1. Visit the login page. 2. Enter right credentials. 3. Check whether date, month and year are valid.	June 5, 1999	Application should display only valid date, month and year	Working as expected

## 9. RESULTS:

### 9.1 Performance Metrics:

- Tracking income and expenses:** Monitoring the income and tracking all expenditures (through bank accounts, mobile wallets, and credit & debit cards).
- Transaction Receipts:** Capture and organize your payment receipts to keep track of your expenditure.
- Organizing Taxes:** Import your documents to the expense tracking app, and it will streamline your income and expenses under the appropriate tax categories.
- Payments & Invoices:** Accept and pay from credit cards, debit cards, net banking, mobile wallets, and bank transfers, and track the status of your invoices and bills in the mobile app itself.

Also, the tracking app sends reminders for payments and automatically matches the payments with invoices.

- **Reports:** The expense tracking app generates and sends reports to give a detailed insight about profits, losses, budgets, income, balance sheets, etc.,
- **E-commerce integration:** Integrate your expense tracking app with your eCommerce store and track your sales through payments received via multiple payment methods.
- **Vendors and Contractors:** Manage and track all the payments to the vendors and contractors added to the mobile app.
- **Access control:** Increase your team productivity by providing access control to particular users through custom permissions.
- **Track Projects:** Determine project profitability by tracking labor costs, payroll, expenses, etc., of your ongoing project.
- **Inventory tracking:** An expense tracking app can do it all. Right from tracking products or the cost of goods, sending alert notifications when the product is running out of stock or the product is not selling, to purchase orders.
- **In-depth insights and analytics:** Provides in-built tools to generate reports with easy-to-understand visuals and graphics to gain insights about the performance of your business.
- **Recurrent Expenses:** Rely on your budgeting app to track, streamline, and automate all the recurrent expenses and remind you on a timely basis.

## **10. ADVANTAGES & DISADVANTAGES:**

### **ADVANTAGES:**

- With proper tracking of your finances, you will not be able to determine unnecessary spending. This spending, if saved, can easily add up to quite a bit.
- In this day and age, when expenses are going through the roof, it has become crucial that you learn to make your money work for you so that you can create a nest egg for the future.
- Has various components of updating and viewing users expenditure
- User can track his expenses by choosing a day and using various filtering Options to study expenses
- Visualization using pie chart with percentage view shows graphical Representation.
- This approach effectively keeps away from the manual figuring for trying
- Not to ascertain the pay and cost each month.
- With a daily expense manager, you will be able to allocate money to different priorities and this will also help you cut down on unnecessary spending. As a result, you will be able to save and be able to keep worry at bay.
- A daily money tracker helps you budget your money so that you use it wisely. If you find that every month your expenses are more than what you earn, it is time to put your house in order and get a money manager app that keeps track of your money without any problem

### **DISADVANTAGES:**

- Lack of visual analytics for expense data
- Lack of support for splitting group expenses
- Suitable for only Personal use.
- Errors are another common problem expense reports drafted with Excel. As is the case with all tasks performed manually and based on paper, it is extremely likely that business

travellers who report expenses make involuntary mistakes: numbers entered wrongly, duplicated expenses or expenses relating to a previous settlement period, misapplication of the expense policy, etc.

- Frequent tracking of cash spending can allow one to catch and correct errors so that the budget plan is still able to be adhered to despite the mistake.

## **11.CONCLUSION:**

From this project, we are able to manage and keep tracking the daily expenses as well as income. While making this project, we gained a lot of experience of working as a team. We discovered various predicted and unpredicted problems and we enjoyed a lot solving them as a team. We adopted things like video tutorials, text tutorials, internet and learning materials to make our project complete.

## **12. FUTURE SCOPE:**

### **1. Mobility**

Businesses are becoming increasingly global and employees are more mobile than ever. According to the Certify Expense Management Trends Report 2018, 47 percent of organizations felt that mobile applications and accessibility were a critical capability of expense reporting software.

Expense management software will begin to respond to this change in the manner that people work by facilitating mobility. Employees will be able to submit reports and managers can approve the claims from a smartphone. Also, mobile applications will become more intuitive and responsive, encouraging greater adoption.

### **2. Travel booking**

According to a 2018 study by Trip actions, 90 percent of respondents believe that travel is important for growth. However, 50 percent of employees don't use the corporate travel solution offered by their organization owing to difficulties and the time taken to book a trip. They prefer using consumer channels.

Using multiple external vendors and disjointed channels to book travel can become tedious and lead to a lot of last-minute chaos. Also, the expenses have to be recorded accurately in the expense management system. It's imperative to integrate the same into expense management software.

### **3. Integrated system**

In 2019, expense management software will begin to consolidate currently disparate actions into a seamless system with credit cards, bank accounts, accounting, payroll, CRM, and more in one place. All these systems share a lot of common information, and it makes perfect sense to connect all these to ensure data integrity.

When integrated with travel applications and travel management company (TMC) solutions, transactions can be entered directly into the system without the need for manual input. Corporate cards can also be linked to the software, which makes it easier to reconcile credit card statements with expense reports.

### **4. Optical character recognition**

According to 66 percent of respondents from the Certify Expense Management Trends Report 2018, ease of use was the top-most feature needed. Traveling employees spend a lot of time filling out expense reports. By using expense management software, businesses brought down the time and cost of expense reporting. This will further go down with advancements in OCR technology.

Optical character recognition (OCR) will be one of the significant ways in which the ease-of-use of expense management tool will be enhanced. It eliminates the need to manually input data from receipts into forms. It will also facilitate mobility.

Employees could just snap a picture of a receipt and have the software extract all the necessary information from it to fill a report. OCR technology is accurate up to 95 percent and doesn't need too much human intervention to verify the information that's been uploaded.

### **5. Artificial intelligence**

As machine learning and artificial intelligence (AI) evolve, they will add to the sophistication of expense management software. There will be improved ability to assign expense general ledger codes based on submissions and smarter categorization of expense types. Rudimentary versions of this exist in a few tools that use rule-based categorization.

AI-powered automation is also expected to minimize fraudulent expense reports. It can monitor, track, and approve expenses, and compliance-related issues will immediately be flagged and eliminated.
